引文與參考書目

Introduction

Citation-引文(註)

According to traditional Chinese medicine, the pericardial meridian is associated with the pain or fullness in the chest, palpitations, depression, restlessness, manic or depressive disorders, nausea or vomiting, hiccups, gastric pain, and distension in the upper abdomen (Bai and Baron, 2001). Since the parasympathetic modulation of both heart and gut is largely mediated by the vagus nerve, and since vagal stimulation of the gut can result in increased peristalsis while the vagal stimulation of the heart can result in decreased heart rate (Guyton and Hall, 1996), it is speculated that to some extent the pericardium meridian might be associated with the autonomic nervous modulation of the subject.

Acupuncture or acupressure at the Neiguan (P6) point, the most frequently used acupoint in the pericardium meridian, has been shown to lessen nausea and vomiting (Dundee *et al.*, 1987, 1988, 1989a and b; Ho *et al.*, 1989; De Aloysio and Penacchioni, 1992; Belluomini *et al.*, 1994; Fan *et al.*, 1997; Harmon *et al.*, 2000). Because nausea and vomiting are also related to autonomic nervous activity (Morrow *et al.*, 1999), it has been speculated that the autonomic nervous activity might be changed when acupuncture at the P6 point was performed.

Heart rate variability analysis is a useful non-invasive method for the assessment of autonomic nervous modulation of heart rate. Some studies have shown that vagal modulation, and the restoration of vagal modulation is associated with the improvement

Hubble telescope maps Voyager probes' cosmic road trip

Analysis reveals the gas clouds the far-flung spacecraft will encounter.

As they sail into interstellar space, NASA's twin Voyager probes are entering a mysteriously complex realm. The spacecraft aren't in completely uncharted territory though.

An Erratum to this article was published on 25 January 2017

Abstract

Despite the global prevalence of gastric disease, there are few adequate models in which to study the fundus epithelium of the stomach. Here, we show that differentiated human pluripotent stem cells can form organoids containing fundic epithelium by

SUPPLEMENTARY INFORMATION

doi:10.1038/nature20584

Supplementary table 1 | Equations describing the ‘Likely water’ cluster hull and cluster overlaps in the multidimensional feature-space.

These equations describe the ‘Likely water’ cluster in the multidimensional feature-space. By definition, part of this cluster contain pixels that are not water, and request additional processing steps to be properly assigned. The method section provides details about the usages of this equations within the expert system classifier.

Name	Description	Equations describing the “Likely water” cluster hull and cluster overlaps in the multidimensional feature-space
water1	Water cluster where NDVI < 0	$\begin{aligned} & b('value') < 0.62 \& \& (((b('hue') < ((-9.867784585617413 * b('nd')) + 238.26034242940045)) \& \& (b('hue') > ((- \\ & 12960.000000000335 * b('nd')) - \\ & 12714.048607819708)) \& \& (b('hue') > ((23.627546071775214 * b('nd')) + 255.53176874753507))) \vee (((b('hue') < ((- \\ & 54.685799109352004 * b('nd')) + 215.15052322834936)) \& \& (b('hue') < ((23.627546071775214 * b('nd')) + 255.5317687475 \\ & 3507)) \& \& (b('hue') > ((-7.321079389910027 * b('nd')) + 224.6166270396205))) \vee (((b('hue') < ((- \\ & 172.0408163265306 * b('nd')) + 191.69646750224035)) \& \& (b('hue') < ((- \end{aligned}$

摘要

Background. In atopic asthma, activated T helper lymphocytes are present in bronchial-biopsy specimens and bronchoalveolar-lavage (BAL) fluid, and their production of cytokines may be important in the pathogenesis of this disorder. Different patterns of cytokine release are characteristic of certain subgroups of T helper cells, termed T(H1) and T(H2), the former mediating delayed-type hypersensitivity and the latter mediating IgE synthesis and eosinophilia. The pattern of cytokine production in atopic asthma is unknown.

Methods. We assessed cells obtained by BAL in subjects with mild atopic asthma and in normal control subjects for the expression of messenger RNA (mRNA) for interleukin-2, 3, 4, and 5, granulocyte-macrophage colony-stimulating factor (GM-CSF), and interferon gamma by in situ hybridization with P-32-labeled complementary RNA. Localization of mRNA to BAL T cells was assessed by simultaneous in situ hybridization and immunofluorescence and by in situ hybridization after immunomagnetic enrichment or depletion of T cells.

提供全文串接網址(下載權限依機構而定)

資料匯入 – 自行鍵入

須注意三個地方:

1. 文獻類型[Reference Type]要選擇正確。
2. 一個作者一行，兩個作者兩行，以此類推。
3. 當以英文輸入時，作者姓氏在前要加逗點，
如: Wang, Da Min 姓氏在後不用加逗點。

偷吃步？

可用Online Search或是Google Scholar匯入

?

Little is known about PM1 effects on respiratory health, relative to larger size fractions (PM2.5). To address this literature gap, we assessed associations between PM1 exposure and asthmatic symptoms in Chinese children and adolescents, compared with PM2.5 (Strotz, 1956; Teesalu, Airaksinen, Tuulonen, Nieminen, & Alanko, 1997).

METHODS: A total of 59,754 children, aged 2-17years, were recruited from 94 kindergartens, elementary and middle schools in the Seven Northeast Cities (SNEC) study, during 2012-2013.

Strotz, R. H. (1956). MYOPIA AND INCONSISTENCY IN DYNAMIC UTILITY MAXIMIZATION. *Review of Economic Studies*, 23(62), 165-180.

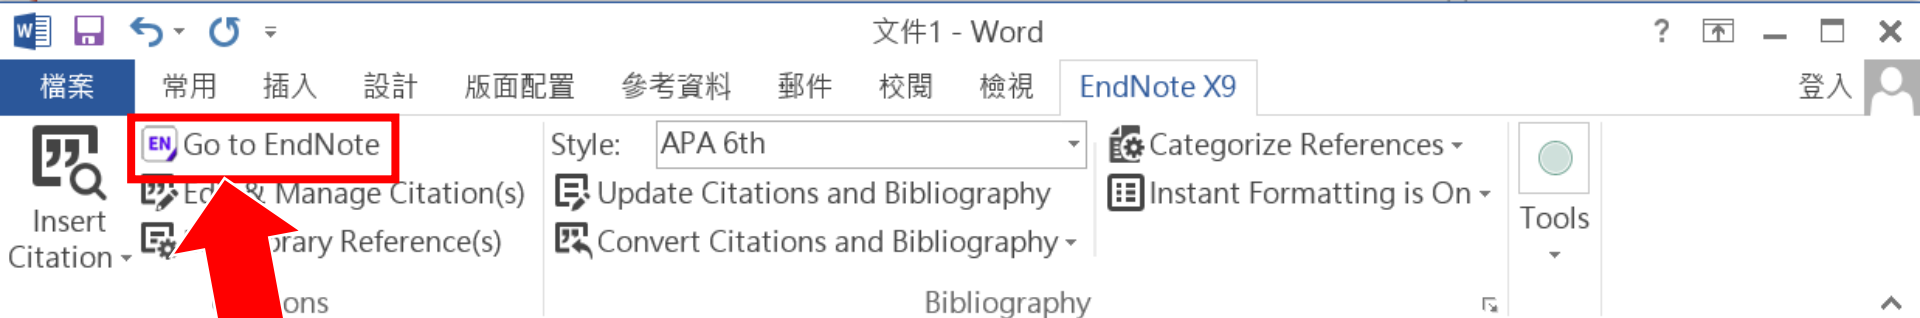

Teesalu, P., Airaksinen, P., Tuulonen, A., Nieminen, H., & Alanko, H. (1997).

Fluorometry of the crystalline lens for correcting blue-on-yellow perimetry results. *Investigative Ophthalmology & Visual Science*, 38(3), 697-703.

“Birdbrain” should be a compliment(Binfield, 2008).

Pioneers in avian intelligence have found that although birds’ brains are very small, they are incredibly intelligent, and sometimes have surprising similarities to the behavior or brain functions of humans. Examples range from the cockatoo who was the first animal documented to dance to a beat to Irene Pepperberg’s in-depth studies done with the African grey parrot Alex (named for Avian Learning EXperiment).(Laudato, 2010; Pepperberg, 1999) There have even been studies documenting that some birds successfully use, and even modify or build, tools.(Bird & Emery, 2009; Holzhaider et al., 2011; von Bayern, Heathcote, Rutz, & Kacelnik, 2009)

Background Data for trends in prevalence of asthma, allergic rhinoconjunctivitis, and eczema over time are scarce. We repeated the International Study of Asthma and Allergies in Childhood (ISAAC) at least 5 years after Phase One, to examine changes in the prevalence of symptoms of these disorders.(Asher et al., 1995; Asher et al., 2006).

Findings Phase Three was completed a mean of 7 years after Phase One. Most centres showed a change in prevalence of 1 or more SE for at least one disorder, with increases being twice as common as decreases, and increases being more common in the 6-7 year age-group than in the 13-14 year age-group, and at most levels of mean prevalence(Bousquet et al., 2008; Constantine, Bressler, Petroni, Metcalfe, & Carter, 2018; Guenter et al., 2018).

Abstract

Background: Electronic cigarettes (e-cigarettes) are becoming increasingly popular with smokers worldwide. Users report buying them to help quit smoking, to reduce cigarette consumption, to relieve tobacco withdrawal symptoms, and to continue having a "smoking" experience, but with reduced health risks. Research on e-cigarettes is urgently needed in order to ensure that the decisions of regulators, healthcare providers and consumers are based on science. Methods: ECLAT is a prospective, 12-month randomized, controlled trial that evaluates smoking reduction/abstinence in 300 smokers not intending to quit experimenting two different nicotine strengths of a popular e-cigarette model ("Categoria": Arbi Group Srl, Italy) compared to its non-nicotine choice. Group A (n=100) received 7.2 mg nicotine cartridges for 12 weeks; Group B (n=100) a 4-week 7.2 mg nicotine cartridges followed by a further 4-week 4.4 mg nicotine cartridges; Group C (n=100) a 4-week 4.4 mg nicotine cartridges followed by a further 4-week 7.2 mg nicotine cartridges.

A stack of seven books with various colored spines (white, red, yellow, blue, purple, white, red) is placed on a light-colored surface. A silver laptop is open to the right of the books, with its screen leaning against the top of the stack. The background is a blurred window with light coming through. The text "Thank you!" is written in a simple black font in the upper right area, and "Just do it" is written in a black script font on the laptop's keyboard area.

Thank you!

Just do it
