

Accessing full-text journal articles from databases off campus

1

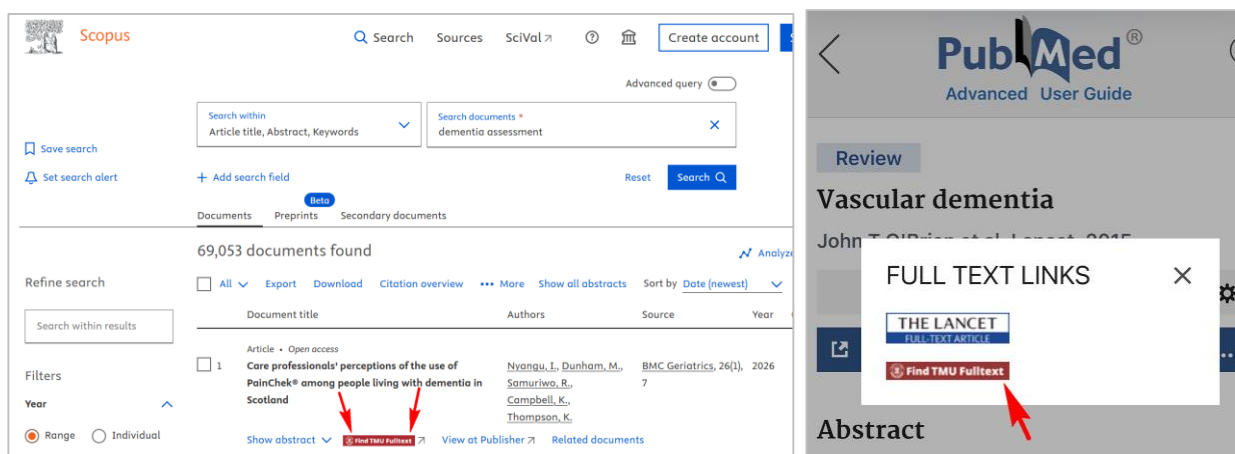

Access PubMed or other Library-subscribed databases via the [Library website](#) or [E-Resources System](#) (excluding Google Scholar) and log in with your TMU or hospital email.

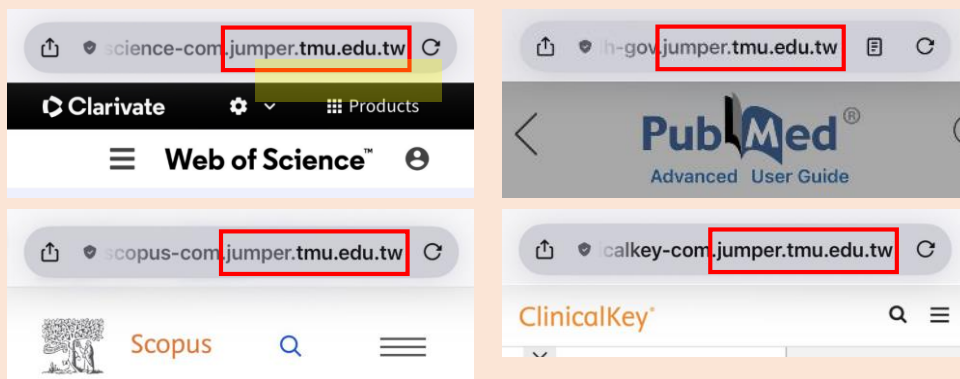

2

In the search results, click [Find TMU Fulltext](#) or [Full Text Finder](#) first.

If full text is still unavailable, try the publisher's link or other available full-text links.

When accessing databases or journal platforms off campus, check that the URL includes “[jumper.tmu.edu.tw](#)” to confirm off-campus access.

Additional Information

- UpToDate is not available via the Electronic Resources system off campus. Please register a personal account on campus first, then log in via the UpToDate app.
- Some journals or databases may not work properly off campus due to automatic website redirects.
- For assistance, please contact the Reference Services Desk.
